M-FIRE 02 EX Zone 0 is a safe flashlight for unsafe places. The flashlight's head is protected from accidental removal with a set screw and the device features a valve for releasing excess gas. The lamp generates light at 133 lm, reaching up to 231 m. It is EX-ATEX and IP67 certified and resistant to drops from 1 m. With two operating modes, it can last up to 69 hours. It can be installed on Gallet and Kalis firefighting helmets or used with a signalling attachment.
