DEMKO 13 ATEX 1205039X

M-FIRE 03 EX Zone 0 is a flashlight for work in explosion risk zones (gas zone 0), as guaranteed by the EX-ATEX certification. The device generates light at 180 lumens, with maximal range of 117 m. One set of batteries provides enough power for 30 hours of operation. A set screw prevents the lamp's head from accidental removal. M-FIRE 03 EX Zone 0 satisfies the IP68 standard and features a magnetic switch and a valve for releasing excess gas. It can be also installed on Gallet and Kalisz firefighting helmets or used with a signalling attachment.
